Alexis Gongora Smith

Senior Software Engineer · Mobile & Full Stack

Snowmass Village, Colorado, USA | +1 786 569 7502 | alexisgongorasmith@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience designing, developing, and deploying mobile and web applications across fintech, logistics, transportation, e-commerce, mobility, education, and SaaS industries.

Specialized in Flutter, Dart, Firebase, REST APIs, GraphQL, geolocation systems, payment integrations, real-time applications, and scalable mobile architectures. Proven ability to lead full software development lifecycles, collaborate with distributed teams, and deliver high-impact solutions used by businesses and end users across North America, Europe, and Latin America.

TECHNICAL SKILLS

Mobile:	Flutter, Dart, Android, iOS
Backend:	Node.js, REST APIs, GraphQL
Databases:	PostgreSQL, MySQL, Firebase
Architecture:	Clean Architecture, Riverpod, Provider, GetX
Cloud & Tools:	Firebase, Git, CI/CD, VS Code, Android Studio
Integrations:	Payment Gateways, Push Notifications, Deep Linking, Google Maps API, Geolocation, Authentication
Methodologies:	Agile, Scrum

FEATURED PRODUCTS

EVSY (Electric Vehicle Charging Platform) — Official mobile application that enables users to locate charging stations, manage charging sessions, review charging history, and process payments.

Sponges (Marketplace Platform) — Published mobile marketplace application connecting customers with service providers through real-time booking and service management.

ENZONA (Fintech Platform) — Contributed to one of Cuba's largest digital payment ecosystems supporting payments, transfers, mobile recharges, and financial transactions.

PROFESSIONAL EXPERIENCE

Mobile Software Developer

Mar 2023 – Feb 2024

EncodeBiz | Spain (Remote)

- Led development of a sports event management platform supporting simultaneous tournaments across multiple locations.
- Designed scalable Flutter architecture and integrated Firebase and backend services.
- Coordinated feature planning, user management, authentication, and real-time synchronization.

Software Engineer Apr 2022 – Dec 2022

idooGROUP Technologies | Mexico (Remote)

- Developed a logistics application for battery distribution operations.
- Implemented geolocation tracking, route management, and delivery monitoring.
- Integrated Firebase services, push notifications, and REST APIs.

Mobile Software Developer May 2021 – May 2022

EVSY | Chile (Remote)

- Developed the official EV charging mobile application for charger discovery and session management.
- Implemented payment processing, geolocation services, and real-time charging operations.
- Delivered a production-ready solution supporting electric mobility users.

Full Stack Developer Sep 2020 – Apr 2021

Sponges | United States (Remote)

- Developed a marketplace platform connecting customers with service providers.
- Built mobile frontend and backend services using Flutter, Node.js, Firebase, and MySQL.
- Delivered production features including booking workflows, payments, and cloud integrations.

Software Engineer (Freelance) Jul 2020 – Oct 2022

Project P.O.P. – Logistics Platform | Mexico (Remote)

- Improved shipment traceability by developing a transportation management platform that enabled route optimization, shipment registration, and real-time delivery monitoring.
- Increased operational transparency by implementing geolocation tracking, push notifications, and status management workflows.

Oxygen – Music Streaming Application | Cuba (Remote)

- Enhanced user engagement by building a music streaming application with playlist management, content discovery, and real-time playback capabilities.
- Improved content accessibility by implementing personalized user experiences and optimized media consumption workflows.

SwinDrinks – Restaurant Management Platform | United States (Remote)

- Streamlined restaurant operations by developing a real-time digital menu platform used to manage products and customer interactions.
- Improved menu administration efficiency by creating centralized management tools and dynamic content updates.

ADDITIONAL EXPERIENCE

Mobile Software Developer | Bios Technology Center 2019 – 2020

Developed mobile applications for sports analytics, education, and social assistance platforms.

Mobile Software Developer | XETID 2017 – 2019

Contributed to fintech, e-commerce, and environmental monitoring applications, including the ENZONA digital payments ecosystem.

EDUCATION

Bachelor's Degree in Computer Science Engineering Graduated: 2016

University of Informatics Sciences (UCI) — Havana, Cuba

LANGUAGES & HIGHLIGHTS

- 8+ Years of Software Development Experience
- Remote Collaboration Across North America, Europe, and Latin America
- Full Mobile Development Lifecycle
- Agile/Scrum Development Methodologies
- Mobile Application Architecture & Technical Leadership
- English: Professional Working Proficiency (B1–B2)
- Spanish: Native
